Objective

Challenging design or programming role in an environment that encourages the pushing of skill-sets and testing of new ideas.

Personal Summary

I produce stunning graphics with the talent of a top-notch creative and produce elegant, simple code with the logic and efficiency of Mr. Spock. I'm a buy-one, get-one of design wizardry. I am A hard-working, determined, out-going team-player, able to adapt to fill the needs of any project.

Education

Macon State College, 2004 - 2006, Macon & Warner Robins, Georgia

Degree Earned: Bachelors of Science in Information Technology

Areas of Study: Programming, Web Development, Computer Hardware, Systems Analysis

Middle Georgia College, 2002 - 2004, Cochran, Georgia

Transfer program, no degree pursued.

Areas of Study: Electrical Engineering, Physics, Mathematics, Computer Science, Chemistry

Skills-Set at a Glance

Programming	UI/UX Design	T-SQL	LMS Management
PHP	Flash	XML/XSLT	LCMS Management
ASP	Papervision 3D	Database Design	Dreamweaver
.NET	JQuery	Project Management	Photoshop
VB	Javascript DOM	Application Analysis	Illustrator
ActionScript 2	AJAX	Reverse Engineering	Pages
ActionScript 3	Print Design	Quality Analysis	Acrobat
XHTML/CSS	Quark	E-Training	Windows XP/Vista
Web Design	Data Management	Development	Linux
Accessibility	MySQL	Lectora Development	Mac OS X

Experience

Branch Assistant – Department of Public Affairs Web

US Coast Guard Auxiliary, Volunteer, June 2008 to Present

Responsible for assisting the Web Branch in the task of maintaining and developing National web-sites to represent the Coast Guard Auxiliary.

Produced a full redesign of the National Public Affairs web-site. The new site is currently in pre-deployment phase.

Flotilla Staff Officer for Communications Services

US Coast Guard Auxiliary, Volunteer, January 2008 to Present

Responsible for sustaining the flow of information to and from the Chain of Command from that National level to the individual level within the flotilla via available conduits to include the internet. Provide and maintain an outlet to the community via the Flotilla web-page. Attend monthly Staff and Business meetings to report to the command and membership.

Cleaned existing Flotilla web-site and implemented a new site, GloucesterFlotilla64.org, built around better communication and sustainability.

Experience (Cont.)

Monitored multiple channels of information and provided e-mail and verbal reports on relevant events and communications.

Official Coast Guard Web-master for the US Coast Guard Cutter CHOCK.

Programmer III

Universal Systems & Technology, US Coast Guard E-Learning Support Office, Full-Time, 2006 to Present

Top-level programmer in an on-site contract office. Sole company representative responsible for providing direct programming and creative support to client projects. Perform in numerous capacities as needed including web, graphic and server management roles. Provide management and support for two nation-wide LMS and LCMS systems. Maintain and develop national Human Performance Technology Web-site. Produce for-print products for client events.

Co-Recipient of US Coast Guards Neils P. Thomsen Innovation Award for 2008 for development of a portable E-Learning LMS system to facilitate e-learning at sea.

Established, designed and developed USCGHPT.org for the Coast Guard's Human Performance Technology Workshop.

Member of an incident response team responsible for recovering and rebuilding the Coast Guards national e-learning system following a compromise.

Responsible for managing a learning web portal that supports 60,000 Active and Reserve Coast Guard Members.

HTML Programmer

Trader Electronic Media, Full-Time, 2005-2006

Directly responsible for the interface maintenance and development of large, complex sites with international audiences. Worked in conjunction with a graphics artist and programmer to craft attractive, stable and reliable sites for multiple businesses within the Trader company.

Responsible for updating over 1000 HTML pages to W3C-standard XHTML and CSS.

Produced a flexible knowledge test used to examine applicant capability.

Acted as a JavaScript and XHTML reference for my peers.

Managed ColdFusion, ASP and PHP based code snippets.
